5. Designing a student database involves certain dependencies which are listed below: $X \rightarrow Y$

$WZ \rightarrow X$ $WZ \rightarrow Y$

$Y \rightarrow W$

$Y \rightarrow X$

$Y \rightarrow Z$

The task here is to remove all the redundant FDs for efficient working of the student database management system.

Ans:

R (W, X, Y, Z) Closure:

$X^+ = X, Y, W, Z$

$Y^+ = Y, X, W, Z$

$WZ^+ = W, Z, X, Y$

6. Debix Pvt Ltd needs to maintain database having dependent attributes ABCDEF. These attributes are functionally dependent on each other for which functionally dependency set F given as:

$A \rightarrow BC$

$D \rightarrow E$

$BC \rightarrow D$

$A \rightarrow D$

Consider a universal relation R1(A, B, C, D, E, F) with functional dependency set F, also all attributes are simple and take atomic values only. Find the highest normal form along with the candidate keys with prime and non-prime attribute.

Ans:
